1	Review functions for this week: Add new employee, found one problem: every business owner can view all employees' details, no privacy between each business owner account.	Add a HashMap <username,BusinessOwner> businessOwnerList in BusinessController, retrieve data from each business owner by username, update employee's details for each business owner separately.
2	Review functions for this week: Add business hours. Same problem as adding employees.	Solve the problem by adding business owner list and manage data by each owner separately.
3	Completed function: a more complicated password is required for registration.	Finished by Ran Lu, test passed.
4	Completed function: need to add an exit function for both business owner and customer menus.	Completed by Ziqi Liu.
5	New user stories & mock up for view all bookings, view new bookings, view all workers' availability for the next 7 days need to be finished.	Tasks finished by Yang Ding.
6	Need clarification from product owner for various functions.	Check with the tutor in tutorials, functions shown below.

Weekly Scrum Meeting Minutes

Meeting No: 9 Week 5 Meeting 1

Date:	31/03/2017

No.	Discussion	Action/Person
1	Ran: We only have 2 functions for bookings left, and all unit tests and probably need to refactor code.	Functions will be completed by Yang and Ziqi, unit tests and documentation will be finished by Ran.
2	Ziqi: There was problems when we chose to view new bookings, currently it compares the time in a day and ignore the date comparison. Ran: If we alter the booking table in db, add one for booking date and another for time, we can compare them separately.	Update database will be completed by Ran, functions for comparing the past bookings and new bookings will be implemented by Ziqi.
3	Ran: we will change the functions for adding business time: a owner can choose which day in a week and manually enter open and closing time.	This function will be changed by Ran. Allow the owner to select a set of days in a week and time.
4	Ran: add employee need to allow an owner to enter multiple day/time sets for each employee.	Task will be finished by Ran.
5	Ran: We need a class diagram.	Class diagram will be created together.
6	Ziqi: We can meet during the semester break to build GUI and other stuff.	Depends on everyone's schedule.
